Exploring the Geology of the Carolinas-Kevin G. Stewart 2015-12-01 How were the Appalachian Mountains formed? Are the barrier islands moving? Is there gold in the Carolinas? The answers to these questions and many more appear in this reader-friendly guide to the geology of North Carolina and South Carolina. Exploring the Geology of the Carolinas pairs a brief geological history of the region with 31 field trips to easily accessible, often familiar sites in both states where readers can observe firsthand the evidence of geologic change found in rocks, river basins, mountains, waterfalls, and coastal land formations. Geologist Kevin Stewart and science writer Mary-Russell Roberson begin by explaining techniques geologists use to "read" rocks, the science of plate tectonics, and the formation of the Carolinas. The field trips that follow are arranged geographically by region, from the Blue Ridge to the Piedmont to the Coastal Plain. Richly illustrated and accompanied by a helpful glossary of geologic terms, this field guide is a handy and informative carry-along for hikers, tourists, teachers, and families--anyone interested in the science behind the sights at their favorite Carolina spots. Includes field trips to: Grandfather Mountain, N.C. Linville Falls, N.C. Caesars Head State Park, S.C. Reed Gold Mine, N.C. Pilot Mountain State Park, N.C. Raven Rock State Park, N.C. Sugarloaf Mountain, S.C. Santee State Park, S.C. Jockey's Ridge State Park, N.C. Carolina Beach State Park, N.C. and 21 more sites in the Carolinas! The Natural Gardens of North Carolina - B. W. Wells 2015-12-01

For seventy years, The Natural Gardens of North Carolina has been a must-read volume for anyone interested in wildflowers, native plants, ecology, or conservation in the state. This handsome revised edition features new line drawings and color photographs, an appendix that updates the botanical nomenclature, an introduction that focuses on B. W. Wells and his passion for the state's landscape, and an afterword that discusses the continuing relevance of Wells's ideas. One of the first scientists to write and lecture about ecology, Wells introduced North Carolinians to the extraordinary tapestry of "natural gardens," or plant communities, within the state's borders back in 1932. His purpose was to help readers understand a plant within its community--a pioneering concept at the time--and to promote conservation. Moving from the Atlantic coast westward, Wells identifies eleven major natural gardens: the sand dune community, salt marsh, freshwater marsh, swamp forest, aquatic vegetation, evergreen shrub bog (or pocosin), grass-sedge bog (or savanna), sandhill, old-field community, upland forest, and high mountain spruce-fir forest. He devotes the first part of his book to a general account of the vegetation and habitats of each community and then identifies and describes the wildflowers found there.

Hunting from Home: A Year Afield in the Blue Ridge Mountains - Christopher Camuto 2003-03-17 Hunting from Home is the culmination of a long and thoughtful journey through the rich natural landscape of the southern Appalachians. A vivid rendering of the four seasons on a Shenandoah Valley farm and in the Virginia mountains. Christopher Camuto has been praised for writing "with the clear-sightedness and imaginative reach both inward and outward of a poet" (Verlyn Klinkenborg). In Hunting from Home, Camuto takes the reader through a year of intense experiences: hunting grouse with his setter through snowbound forests in winter; wading trout streams in spring; closely observing birds and wildlife through summer; exploring the backcountry, cutting wood, and hunting deer in autumn. He takes seriously and joyously Thoreau's injunction to practice "the discipline of looking always at what is to be seen." Camuto writes incisively about the hunter's paradoxical love of the game he pursues; but he also hunts in the broadest sense possible, searching out and witnessing the life of the things he loves: brook trout and black bear, hawks and warblers with the hope of sharing the pleasures and preoccupations of a "border life" lived, with deep satisfaction, in the shadow of the Blue Ridge. 4 b/w illustrations.

Hunters of the Northern Forest - Richard K. Nelson 1986-10-15 Boreal forest Indians like the Kutchin of east-central Alaska are among the few native Americans who still actively pursue a hunter's way of life. This updated edition of Hunters of the Northern Forest stands as the only complete account of subsistence and survival among the Kutchin, capturing a final glimpse of a way of life at the crossroads of cultural development.
